

The screenshot displays the Adobe Photoshop Lightroom Develop module. The main workspace is split into two panels: 'Actuel' (Current) on the left and 'Aperçu d'épreuve' (Proof) on the right, both showing a landscape photo of a coastal town with mountains in the background. The left sidebar contains a 'Navigation' panel with a photo thumbnail and a 'Prédef.' (Presets) panel with various preset categories like 'Paramètres prédéfinis d'effets de Lightroom' and 'Paramètres prédéfinis généraux de Lightroom'. The right sidebar features several adjustment panels: 'Epreuve écran' (Screen Proof) with a histogram and 'Citer une copie d'épreuve' (Cite a proof copy) section; 'Réglages de base' (Basic) with sliders for Temperature, Tint, and other tonal controls; and 'Courbe des tonalités' (Tone Curve) with a grid and sliders for highlights and shadows. The bottom of the interface shows a filmstrip of photo thumbnails and a taskbar with system icons and the date '29/08/2017'.
